## IT RISK MANAGERS, INC. SEES DOUBLE-DIGIT GROWTH 8<sup>TH</sup> YEAR IN A ROW

*Okemos, Michigan, January 2010* – For the 8<sup>th</sup> year in a row, IT Risk Managers, Inc. has increased annual revenue by over 10%. Despite the current economy, both premium and revenue grew in 2009.

This growth stems from the changing insurance market. IT Risk Managers, Inc. specializes in insurance for technology providers and technology users. In conjunction with state and federal regulations regarding data breaches, the need for database insurance is increasing. IT Risk Managers, Inc. provides database insurance for businesses and grows as more companies recognize the need for database insurance.

This growth can also be attributed to the Auctioneer Insurance Program, a specialized insurance program designed by auctioneers, for auctioneers. Lawrence Harb, President and CEO of IT Risk Managers, Inc., helped design the program and is now a licensed Auctioneer.

In the current economic climate, IT Risk Managers, Inc. is overjoyed to be experiencing this success and wants to share good news with the community.

IT Risk Managers, Inc. is a premier internet and technology insurance wholesaler that provides risk management solutions for companies in the technology business and for companies that use technology. We are a broker of technology, database, security and privacy insurance. We can also assist with almost any insurance need. For more information, visit <http://www.itriskmanagers.com>.
